

nursery "a little dog at home", that
will know him. -

I wonder whether it wd be possible to
get leave from the Leyden authorities
to try those curious Objectives & eye-
pieces (No. 1837.) Huggins I sh^d. think
wd be pleased with the job, & the result
wd be interesting - on terrestrial objects
it could be managed - especially at such
a place as Greenwich - without the ex-
pense of tubes & other apparatus. -

I sh^d. so much like to talk over that
light question with you. I don't under-
stand aberration (not of ~~tube~~ lenses but
of light) & similar things, on the suppo-

sition of transverse undulations

But then you know I am

A Goose.
