My dear Mr. Atter

I ought to have thanked you  
ere now for your great kindness  
in Mr. Stevenson's business - &  
especially for the friendly consider-  
ation which spurs my copying  
out your instructions. I shall  
daily forward your letters.

Do you happen to recollect my  
having, some months ago, forwarded  
to you a curious MS. by a Mr.  
Peal of Asen, about the snow &  
ice in the Moon. If you have  
quite done with it, & when you  
can conveniently lay your hands  
upon it, would you please let me  
have it. I want to send it to Esplanade  
for the Liverpool Society. They
